The patents to Nakajima et al. (5,575,872) and Nakajima et al. (5,445,481) are cited to show prior art tip dressing arrangements wherein the relative pressure between the cutter and the electrode tip is varied during the dressing process.

The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches or suggests the particular apparatus claimed with the control unit that controls the servo motors of the servo gun and the dresser whereby the pressure and the revolution of the cutter are changed during the grinding process as set forth in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
